

Unlocking the Future of Real Estate Investment: REtokens partners with Polymath

REtokens, a pioneering real estate tokenization company, is partnering with Polymath to revolutionize real estate investment by leveraging Polymath's platform and blockchain expertise to streamline tokenization, navigate regulations, and empower a broader range of investors, making real estate investment more accessible and secure.

We are so passionate about this new partnership that is poised to revolutionize the world of real estate investment. Introducing REtokens, a visionary company dedicated to harnessing the power of tokenization for the real estate market. With a steadfast commitment to innovation and security, REtokens is proud to align with Polymath — a strategic move that will reshape the landscape of real estate investment.

REtokens is rewriting the playbook for real estate investment. Their vision centers on streamlining the process of tokenizing real estate, making it more secure, accessible, and user-friendly than ever before. They empower property owners as well as those purely wanting to invest in real estate, to raise capital, increase equity, and refine investment strategies through a robust tokenized real estate system.

At the helm of REtokens is visionary CEO, Tyler Vinson. With over two decades of experience in real estate investment acquisitions and private equity, Mr. Vinson has consistently demonstrated innovative deal structuring and financial prowess, completing many multi-million-dollar transactions. As the owner of **Extant Investment**, a successful investment real estate brokerage and property management company, he has consistently been able to innovate some of the industry's best acquisitions and asset management strategies. Mr. Vinson's work with clients to maximize their strategic objectives and financial deal structures over the last 14 years has created high demand for education in the real estate investment space – and more recently, insightful strategies to help create superior real estate deals leveraging tokenization and blockchain technology.

His expertise at the intersection of real estate and technology is driving REtokens' mission.

On the Polymath side, this aligns with seasoned CEO Vince Kadar — an accomplished leader with over 25 years of experience in financial software and services, Mr. Kadar is guiding Polymath in delivering a transformational platform for capital markets. The synergy between his tokenization focus and Mr. Vinson's vision for real estate investment transformation is a testament to the synergy between REtokens and Polymath – a shared belief that tokenization has the potential to revolutionize real estate investments. Digitizing real estate assets creates digital securities or tokens representing ownership of financial assets. This groundbreaking approach addresses issues of illiquidity, increasing value and accessibility for investors.

“Selecting the right technology partner was a critical decision for REtokens' mission to reshape real estate investment. The clear choice for us was the Polymath Capital Platform.”

Tyler Vinson

Choosing the right technology platform and associated blockchain for regulated securities is critical, and REtokens recognizes the importance of this choice. That's why they chose the Polymath Capital Platform, which is built on the Polymesh blockchain, as the perfect partner for security tokens in the real estate space. Polymesh's institutional-grade, public-permissioned blockchain aligns seamlessly with the shared commitment to security and innovation and provides built-in compliance and comprehensive support – a structure that no other blockchain can claim.

REtokens and Polymath are united by a shared vision — a vision of democratizing real estate investment. Traditional real estate investment has often been an elite endeavor, but tokenization is changing the game. By fractionalizing real estate, tokenization reduces barriers to entry and empowers a broader range of investors, and opens up the possibility for increased wealth and prosperity for those otherwise unable to participate in such projects.

CEO of REtokens, Tyler Vinson shares his excitement in this new chapter in real estate investing: "Selecting the right technology partner was a critical decision for REtokens' mission to reshape real estate investment. The clear choice for us was the Polymath Capital Platform. Its user-friendly approach, coupled with the institutional-grade blockchain Polymesh, aligns seamlessly with our commitment to security, compliance, and innovation. With Polymath, we're confident in realizing our vision of transforming real estate investment and creating a future that's more accessible and impactful for investors worldwide." He believes in the possibilities of this collaborative partnership, and he is passionate that "tokenization unlocks a host of benefits for investors. As we embrace this innovation, we're not only transforming real estate investments but also shaping the future of finance. Our partnership with Polymath, driven by Polymesh's cutting-edge technology,

cements our commitment to a brighter, more inclusive investment landscape."

Together, REtokens and Polymath are paving the way for a new era in real estate investment — one that's more accessible, secure, and revolutionary. Stay tuned as we redefine the future of real estate investment.

/ Highlights

Why REtokens chose Polymath

Efficient tokenization: Polymath's platform accelerates REtokens' real estate tokenization process, ensuring efficiency and compliance.

Innovating real estate: By partnering with Polymath, REtokens aligns with the shared goal of revolutionizing real estate investment through technology and tokenization.

Navigating regulations: Polymath simplifies the complex landscape of international regulations, aiding REtokens in global compliance effortlessly.

User-friendly experience: Polymath's intuitive platform provides a seamless collaboration tool, crucial for REtokens' strategic timeline.

Empowering investment: Polymath's tech expertise in alternative investment operations complements REtokens' mission to democratize real estate investment.

Secured blockchain: With Polymesh, an institutional-grade blockchain, REtokens ensures robust governance, confidentiality, and compliance.

Elevating value: Polymath's advanced solutions enhance REtokens' potential, creating a new era in accessible and secure real estate investment.
